# Areas for Improvement

- Manhattan Pizza has concerns on three main focus areas:
  - Informational Requests: General/common questions from customers
  - Orders: Processes when customers place orders
  - Analytics: Processes when management request sales or other analytical data
- No automation, processes consisted of 100% manual human intervention
- Save time and money on processes

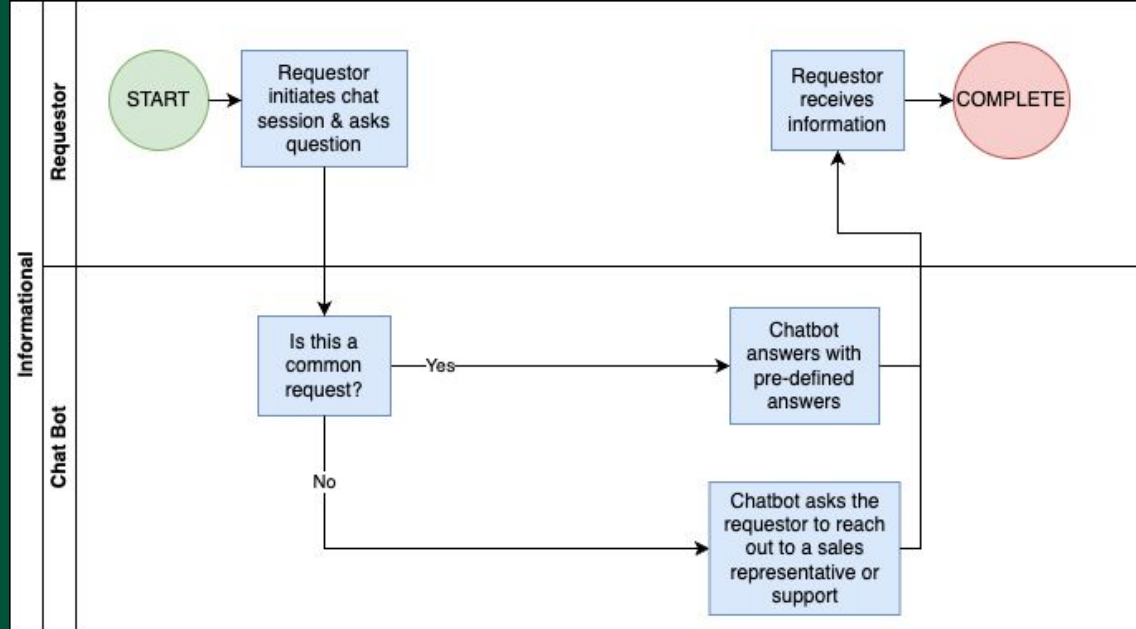

# Requirements and Plan

IMPORTANCE

Criteria	Sponsor's Requirements	Team's Plan
<b>Ordering Process</b>	Seamless integration with existing systems, low training needs for staff	<b>POS Online Ordering:</b> Live staff training demo, user-friendly design
<b>Analytics</b>	Higher data accuracy and consistency	<b>Analytics Dashboard:</b> Quality checks to ensure data integrity and security
<b>Informational Requests</b>	Faster FAQ process times, decreased email flooding	<b>AI Chatbot:</b> Verified by response analysis

# Product Transition

## Transition:

- Emergency PoC and Contact Information
- Product Design Documents
- Hardware
- Software
- Commercial Software Products and Vendors
- Maintenance Documentation
- Training Documentation
- Location of Installed System

### What is Transition Planning?

This Transition Plan describes how the ACS/Manhattan Pizza Ordering Website, Chatbot and Analytics Dashboard project will be transitioned into Manhattan Pizza's day-to-day operations. Our plan contains an overview of the system, a brief description of the major tasks involved in the implementation, the overall resources needed to support the implementation effort (such as design information, hardware, software, source code and documentation), and any other implementation requirements.

### This Transition Plan is divided into the following sections:

- A) Emergency PoC and Contact Information
- B) Product Design Documents
- C) Hardware
- D) Software
- E) Commercial Software Products and Vendors
- F) Maintenance Documentation
- G) Training Documentation
- H) Location of Installed System
